Southampton, Hampshire

Profile

Within previous roles I have demonstrated my ability to communicate ideas in an effective way, collaborating well with others to bring ideas into reality. A hard-working person who can take on other responsibilities that may not be within my skillset, learning from others proactively and solving issues in the process. Have been involved in multiple group projects, both in work and education, which required adapting to different roles whilst also being able to communicate with others to understand what is required.

Key Skills

- Communication skills
- Presentation skills
- C#
- User Experience Design (UED)
- Project Management
- Sound Design
- 3D Modelling
- Game Development
- HTML5
- Google Analytics
- Marketing

Employment History

Remote Digital Marketing Assistant, Episteme Productions, October 2021-September 2022

- As part of an online ARG, my role was acting as a technical adviser and programmer for many aspects of digital marketing and promotion
- This included the creation of Websites using both WordPress as well as pure html/css using express
- Other responsibilities included: Creation of several discord bots (using discord.js) for use in more immersive storytelling/worldbuilding. Using a Minecraft server, produce and develop several events that would provide extra content to players. Rework the already existing website using a new framework, to provide better functionality. Also set-up ads tracking using Google tag manager
- Alongside my main responsibilities, I also worked on several 3D models that were intended for use within the world of Minecraft, as well as to collaborate with the rest of the team to produce content such as new story arcs and promotional material

Training and Qualifications

Get Started in Games Design, The Princes Trust/Shapeways, May 2024

- Learnt concepts around games design
- Worked within a team
- Built my own game and presented this to the group
